PROJECTS

McDonald's UX Case Study – Heuristic Evaluation & Redesign Nov, 2025

- Conducted a comprehensive heuristic evaluation of the live McDelivery platform, identifying 7 critical usability issues including navigational friction and visual asymmetry.
- Redesigned core navigation structure by implementing a persistent (sticky) sidebar, solving the "disappearing menu" issue and significantly reducing user scroll fatigue.
- Optimized the "Food Details" modal interaction, transforming the layout from a restrictive square to a wide rectangle to display nutritional info without unnecessary vertical scrolling.

ClanForge – Student Collaboration Platform Sep 2025 – Nov 2025

- Designed and developed a responsive front-end interface connecting students for hackathons and technical projects based on verified technical competencies.
- Engineered a seamless "Request & Approval" workflow UI, allowing team creators to easily review applicant details and verify skills before accepting them into a group.

OtakuCircle – Social Anime Discovery Platform Dec 2025 – Jan 2026

- Designed UI/UX and developed the front-end architecture for a social anime tracking platform utilizing the MERN stack.
- Designed an intuitive "Social Activity" system and a statistical dashboard, allowing users to easily visualize their consumption habits and view friends' watch histories without cognitive overload.

Ledgerly – Links Collection & Storage Platform Feb 2026 – Apr 2026

- Designed and developed a centralized visual hub for discovering and managing essential web tools, featuring a curated "LinkHub" categorized by domain.
- Architected an intuitive, secure "Saved Links" dashboard where users can custom-label resources and append metadata, prioritizing a frictionless personal asset management experience.

TECHNICAL SKILLS

- UI/UX & Design:** Wireframing, Rapid Prototyping, Visual Hierarchy, Heuristic Evaluation, Product Design, Figma
- Front-End Technologies:** React, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3
- Core Concepts:** Component-Based Architecture, Responsive Web Design
- Soft Skills:** Technical Communication, Project Planning, Cross-Functional Collaboration

EXPERIENCE & LEADERSHIP

GeeksforGeeks Student Chapter | *Vice-President* Jun 2025 – Jul 2026

- Directed a cross-functional core technical team to plan and execute large-scale technical events, including hackathons and webinars, boosting student engagement and technical skill development.
- Spearheaded project execution workflows and maintained seamless communication with Faculty Coordinators and external stakeholders, ensuring 100% on-time event delivery and strategic alignment.

The Fusion Club | *Graphic Designer* May 2024 – Sep 2025

- Established and led the club's visual strategy, assisting in the front-end development of the official website to ensure a cohesive user experience.
- Managed design team's creation of event-related promotional materials, ensuring a consistent and engaging digital identity.

The Electric Vehicle Club | *UI/UX & Design Lead* Oct 2024 – Mar 2025

- Led the end-to-end visual and digital strategy, driving the UI/UX design and front-end development of the official club website to enhance user accessibility and platform engagement.
- Managed a collaborative design team in the rapid production of promotional materials, standardizing design workflows to establish a cohesive digital brand identity.
